

Associate Professor Canan Sevimli-Gur, is the Head of Kocaeli University Biotechnology Department and has been working as a lecturer and has an academic experience of 20 years.

She attained her Ph.D. degree in 2009 from Ege University Institute of Science, Department of Biotechnology, Discipline of Biochemistry Engineering. She worked as a research assistant between 2003 – 2009 at Ege University Faculty of Engineering, Department of Bioengineering. She worked as a researcher and as an executive in various and wide range of research projects that are in scope of her field. She won numerous prizes and scholarships. She has got a great deal of articles in journals that are screened by SCI. She has got scores of paper that have been presented in national and international congresses.

She is continuing her studies on subjects such as chemistry of natural products, chromatography, isolation and purification, structure determination, research on the biologic activities of natural products, encapsulation and preparation of nanoparticles, research on DNA topoisomerase I enzyme inhibitors, molecular biology of cancer cells, DNA damage and restoration mechanisms and research on apoptosis pathways, burn and wound healing, research on biomaterials and their biocompatibility.

Canan Sevimli-Gur is married and is the mother of Azur Gur.
